

Industrial Sewing Machine for Garments and Shoes

This high-speed industrial sewing machine is designed for manufacturing garments, shoes, and accessories. Its robust construction ensures durability and precise stitching for various fabric types.

Overview

High-Performance Industrial Sewing Solution

This high-speed industrial sewing machine is engineered specifically for the rigorous demands of garment, shoe, and accessory manufacturing. Its robust construction ensures long-term durability and precision stitching, making it a reliable choice for continuous operation in busy production environments. With adjustable stitch length and tension settings, it provides the versatility required for handling various fabric types and complex applications.

Technical Specifications

Model Number	BS-200N
Suitable Applications	Garments, Shoes, Accessories, Apparel Manufacturing

Performance Features

Operation Mode

High-Speed • Continuous Operation

Adjustable Parameters

- Stitch Length
- Thread Tension
