

Industrial Sewing Machine for Garments and Shoes

This industrial sewing machine is designed for manufacturing garments and shoes. It features a high-speed stitching mechanism and an adjustable stitch length.

Overview

Industrial Sewing Machine

This industrial sewing machine is engineered specifically for the demanding environments of garment, shoe, and accessory manufacturing. It features a high-speed stitching mechanism designed for continuous, reliable operation in professional settings. With an automatic lubrication system and adjustable controls, this machine ensures precision and efficiency for large-scale production needs.

Technical Specifications

Lubrication System	Automatic
Operation Type	High-speed continuous
Stitch Length Adjustment	Yes

Features

Control Interface

User-friendly • Precise Adjustment

Primary Applications

Garment Manufacturing, Shoe Production, Accessories
