

Industrial Sewing Machine for Garments and Shoes

This industrial sewing machine is engineered for high-volume production. Its robust construction ensures durability and reliability for various materials, including leather, textiles, and synthetics.

Overview

Professional Industrial Sewing Solution

This heavy-duty industrial sewing machine is engineered specifically for high-volume manufacturing environments, including garment and shoe production. Its robust construction ensures long-term durability and reliability for demanding daily operations. The machine offers precise stitching capabilities and adjustable settings, making it a versatile tool for professionals working with leather, textiles, and synthetic materials.

Technical Specifications

Primary Applications

- Garment Manufacturing
- Shoe Production
- Accessory Assembly

Model Number	GK2000AB
Compatible Materials	Leather, Textiles, Synthetics

Performance

Performance Highlights

1 Heavy-Duty

Production Grade

Operational Features

High-Volume Production • Adjustable Settings • Precise Stitching
