

Industrial Sewing Machine for Garments and Shoes

This industrial sewing machine is designed for manufacturing garments, shoes, and accessories. It features a robust build for continuous operation and includes precision components for accurate stitching.

Overview

Industrial Sewing Machine

Designed for heavy-duty garment, shoe, and accessory manufacturing, this industrial sewing machine ensures consistent, high-quality performance. It features a robust build engineered for continuous, professional-grade operations. With precision components and adjustable settings, it accommodates a wide variety of fabric types and thicknesses, making it an essential tool for high-volume production environments.

Technical Specifications

Key Features

- Heavy-duty construction
- Continuous operation capability
- Precision stitching components
- Adjustable settings for fabric thickness

Model Number	BSD-845-3
Primary Applications	Garment Manufacturing, Shoe Production, Accessories
