

Industrial Sewing Machine for Garments and Shoes

This high-speed industrial sewing machine is designed for manufacturing garments, shoes, and accessories. It features robust construction, precision stitching, and adjustable settings for various fabric types.

Overview

High-Performance Industrial Sewing Solution

This high-speed industrial sewing machine is engineered specifically for the demanding requirements of garment, shoe, and accessory manufacturing. Built for continuous operation, it offers precision stitching capabilities and robust construction to ensure long-term durability. Adjustable settings allow for versatility across various fabric types and thicknesses, making it an essential tool for high-efficiency production environments.

Technical Specifications

Key Operational Features

- High-speed performance
- Continuous operation capability
- Precision stitching
- Adjustable settings for fabric thickness

Model Number	GK32000
Primary Applications	Garment Manufacturing, Shoe Production, Accessories
