

Industrial Sewing Machine for Textile Manufacturing

This heavy-duty industrial sewing machine is designed for robust textile manufacturing. It features a sturdy frame, large flywheel, and specialized needle mechanism for reliable performance in diverse apparel and textile applications.

Overview

Industrial Sewing Machine for Textile Manufacturing

This heavy-duty industrial sewing machine is specifically engineered for high-demand textile manufacturing environments. It features a robust frame for enhanced stability and a large flywheel that ensures consistent power delivery during extended operation. Designed for precision, the specialized needle mechanism allows for high-quality stitching, making it a reliable solution for various apparel and textile production requirements.

Key Features

Maintenance Features

- Oil level indicator
- Automated lubrication support
- Large flywheel design

Design & Utility

Heavy-duty, Industrial Grade, Stable Frame, High-Lead Compatibility

Performance

Operational Metrics

1 High

Flywheel Consistency
