

Industrial Sewing Machine

This industrial sewing machine is designed for professional use. It features a high-speed stitching mechanism, adjustable stitch length and width, and a robust construction for durability.

Overview

Industrial Precision Engineering

This industrial sewing machine is engineered for high-performance professional environments. It features a robust construction designed for long-term durability and consistent, reliable operation. Equipped with a precision control system and a powerful motor, it handles various fabric types with ease and efficiency.

Technical Specifications

Key Features

- High-speed stitching mechanism
- Adjustable stitch length
- Adjustable stitch width
- Heavy-duty industrial construction
- Precision control system

Safety Warnings

ORIENT, CAUTION
