

Industrial Shear Knives for Shearing Machines

These industrial shear knives are designed for use in shearing machines. The knives are manufactured from hardened steel and feature precision-ground cutting edges.

Product Overview

Precision Industrial Slicer Knives

These industrial slicer knives are engineered for high-performance cutting in wood industry applications. Featuring advanced heat treatment and optimal jointing technology, they deliver extreme flatness and consistent cutting precision. Manufactured from superior high-speed steel and alloy grades, these blades are designed to meet demanding thickness requirements and ensure long-lasting durability during continuous operation.

Technical Specifications

Performance Features

- Extreme flatness
- Precision-ground cutting edges
- Durable sharpness
- Hardened steel construction

Design Specifications

- Integrated mounting holes for secure attachment
- Compatible with various wood working equipment

Material Composition

High Speed Steel, Alloy Steel

Target Industry

Wood Industry
