Product Overview

Industrial Shot Blasting Solution

This industrial-grade shot blasting machine is engineered for high-performance surface preparation, cleaning, and descaling. It features an enclosed blast chamber with an integrated automated shot recovery and dust collection system to ensure both operator safety and a clean working environment. Designed for versatility in metalworking, the machine supports consistent surface finishing through customizable blast parameters and robust conveyor-fed automation.

Operational Capabilities

Core Features

- Automated shot media delivery and recovery system
- Integrated dust collection system
- Conveyor system for continuous loading
- Multi-wheel blast configuration for uniform coverage
- Adjustable blast parameters control panel

Primary Applications

Surface Preparation, Descaling, Deburring, Cleaning, Coating Preparation

Equipment Design

Safety Compliance

Enclosed Blast Chamber • Ventilation Integrated

Design Type

Modular industrial construction with enclosed chamber
