

Industrial Single Output 12V 5A Power Supply

This industrial power supply offers a selectable AC input and delivers a stable 12V DC output at 5A. Its design ensures 85% efficiency and reliable performance for indoor industrial applications.

Product Overview

Industrial-Grade Power Solution

This industrial single-output power supply is designed for high efficiency and reliability in demanding environments. Featuring a compact, lightweight, and ventilated metal chassis, it ensures excellent heat dissipation and protection for sensitive components. It is an ideal choice for powering industrial automation equipment, LED lighting systems, and various DC-powered apparatus.

Electrical Specifications

Performance Metrics

12 V

Output Voltage

5 A

Rated Current

Input Voltage Range	90-130VAC / 170-265VAC
Frequency	60 Hz
Output Voltage	12 V
Output Current	5 A

Mechanical & Safety

Certifications

CE • RoHS

Design Features

- Ventilated metal case
- Adjustable voltage output
- Screw terminal connections

Dimensions	159 x 97 x 38 mm
Protection Features	Overload Protection, Overvoltage Protection
