

Industrial Single Output 24V DC Power Supply

This industrial power supply is designed for indoor applications. It features selectable AC input and provides a 24V DC single output.

Overview

Industrial Power Solutions

This industrial-grade single output power supply is engineered for reliability, featuring a compact, lightweight design with high efficiency and low noise operation. It is specifically designed to handle demanding environments, making it suitable for aerospace, military, and various home appliance applications. The unit includes advanced thermal management with an automatic fan control circuit that adjusts operation based on internal temperatures.

Electrical Specifications

Input Voltage Range	90-130VAC / 170-265VAC
Frequency	60 Hz
Output Voltage	24 V
Output Current	14.6 A
Input Current	5.8 A

Physical Characteristics

Dimensions	215 x 115 x 49 mm
------------	-------------------

Features & Compliance

Safety Protections

Overload Protection • Overvoltage Protection

Certifications	CE, RoHS
Thermal Management	Built-in fan with automatic temperature-controlled on/off circuit
