

# Industrial Soldering Iron with Stand

This soldering iron is a hand tool used to melt solder for joining two workpieces. Designed for industrial use, it features a durable construction and includes a stand for safe placement.

## Product Overview

### Industrial Precision Soldering

This industrial-grade soldering iron is designed for professional applications, providing reliable performance and precision for various electrical tasks. It operates on a standard 230V power supply and features a robust 60W heating element for efficient operation. With a rapid 3-5 minute preheat time, it ensures quick readiness for your projects, while the included support stand promotes safety during use.

## Technical Specifications

Input Power	60 W
Voltage & Frequency	230V ~ 50Hz
Preheat Time	3-5 minutes

## Design & Features

Tip Shape	Straight
Safety Inclusions	Integrated Support Stand, Industrial Design

## Compliance & Packaging

Certifications	GS • CE
Packaging	Blister card
