

Industrial SPA Heat Pump for Temperature Management

High-efficiency SPA heat pump designed for industrial applications. Features a robust enclosure, advanced cooling grid, and integrated control panel for precise temperature management.

Overview

Industrial SPA Heat Pump

The TP-15H3U is a high-performance heat pump designed specifically for demanding industrial temperature management applications. This robust unit delivers consistent performance, offering both heating and cooling capabilities to maintain optimal environmental conditions. With an impressive C.O.P of 4.27, it provides an energy-efficient solution for professional-grade temperature control.

Performance Metrics

Key Performance Indicators

15000 Btu
Heating Capacity

4.27 ratio
C.O.P (Heating)

13000 W
Cooling Capacity

Technical Specifications

Model Number	TP-15H3U
Power Supply	220-240V ~ 50Hz
Heating Input Power	1100 W
Cooling Power Input	1450 W
