

Industrial Steam Press Iron YG-1A

This heavy-duty, all-steam press iron is designed for industrial and commercial textile applications. Its durable construction ensures long-lasting performance and consistent steam output for efficient fabric pressing.

Product Overview

Industrial Steam Press Iron YG-1A

The YG-1A is a heavy-duty, all-steam press iron engineered for rigorous commercial textile applications. Designed for consistent steam output, this unit delivers efficient pressing performance across a wide range of fabric types. Its robust construction ensures reliable operation in demanding environments such as garment factories, professional laundries, and tailoring workshops.

Technical Specifications

Model Identification	YG-1A
Operation Type	All-steam
Industry Applications	Garment Manufacturing, Commercial Laundry, Tailoring

Key Features

Key Features

- Heavy-duty industrial construction
- Ergonomic handle for extended comfort
- High-efficiency steam delivery system
- Built for continuous commercial use
