

Industrial Stone Crushing Machine

This stone crushing machine efficiently reduces the size of rocks and minerals. It features a robust construction with a material hopper, crushing chamber, and discharge chute.

Product Overview

Industrial Crushing and Grinding Solutions

This industrial-grade machinery is engineered for efficient size reduction of rocks, minerals, and other hard materials. Designed for demanding environments, it combines robust structural integrity with high-performance throughput capabilities. It is an ideal solution for professionals working in construction, mining, and aggregate production who require reliable material processing.

Technical Specifications

Rated Power

12 HP

Minimum Power

18 HP

Maximum Power

Rated Speed

2000 RPM

Throughput Capacity

500 - 800 kg/h

Design and Build

Construction Highlights

- Heavy-duty feeding hopper
- Hardened internal crushing components
- Corrosion-resistant yellow exterior finish
- Integrated discharge chute
- Easy-access maintenance points

Key Applications

Mining, Construction, Aggregate Production, Stone Processing
