

Industrial Switchboard Enclosure

This enclosure is designed to house electrical components, such as switchboards and related accessories. It features a hinged door with a sealing gasket to provide a secure and weather-resistant closure, suitable for industrial or commercial applications.

Product Overview

Industrial Switchboard Enclosure

This robust industrial switchboard enclosure is designed to provide secure, weather-resistant protection for critical electrical components. Featuring a high-durability steel construction, it is engineered to shield sensitive switchboards, circuit breakers, and electrical controls from environmental damage. The unit includes a hinged door with a sealing gasket and a reliable latching mechanism to ensure both safety and easy access for maintenance.

Technical Specifications

Internal Mounting

- Switchboards
- Circuit Breakers
- Electrical Components

Construction & Design

Key Design Elements

Hinged Door, Sealing Gasket, Latching Mechanism, Durable Construction

Application

Application Environment

Industrial • Commercial
