

Industrial Textile Drying Machine

This industrial textile drying machine automatically signals when a drying cycle is complete. Its slim and compact structure houses a large-capacity stainless steel drum for efficient textile processing.

Overview

Industrial Textile Drying Machine

This industrial automatic drying machine is engineered for high-volume, heavy-duty laundry operations. Constructed with durable stainless steel, it provides excellent resistance to corrosion and long-term reliability. The system features a large-capacity drum designed to maximize throughput and efficiency, making it an ideal solution for commercial environments such as hotels, hospitals, and large-scale laundry facilities.

Technical Specifications

Construction Material	Stainless Steel
Suitable Environments	Hotels, Hospitals, Commercial Laundries

Performance

Operation
Automatic

Control System

- Adjustable temperature control
- Programmable drying time
- Energy-efficient operation
