

# Industrial Textile Wet Processing Machine

Industrial textile machinery designed for fabric processing and finishing. It features a robust cabinet with an integrated control panel and fluid delivery system for dyeing, washing, or other wet processing applications.

## Product Overview

### Industrial Textile Wet Processing Efficiency

This industrial textile wet processing machine is engineered for high-performance fabric finishing and treatment. Featuring a robust cabinet design with integrated control systems, it provides precision fluid management for dyeing and washing applications. Designed for seamless integration into modern manufacturing lines, it ensures reliable automated processing with consistent results.

## Operational Features

### Automation Level

Super Automatic

### Supported Processes

Dyeing, Washing, Wet Processing

## Technical Specifications

### Core Machine Metrics

**1 Integrated**  
Control System

**1 Integrated**  
Fluid Delivery System
