

Industrial Three-Phase Asynchronous Motor

This high-efficiency three-phase asynchronous motor is designed for industrial applications. Its robust construction includes a flange mount, ensuring straightforward installation and consistent performance in various settings.

Product Overview

Industrial Three-Phase Asynchronous Motor

This high-efficiency three-phase asynchronous motor is engineered specifically for demanding industrial environments. Featuring robust construction and a convenient flange mount, it offers reliable and consistent performance across a wide range of applications. The integrated enclosure ensures protection against environmental factors, contributing to an extended service life and optimized energy efficiency.

Performance Specifications

Efficiency Level

High Efficiency

Motor Type

Three-phase asynchronous

Mechanical Construction

Mounting Type

Flange mount

Enclosure Features

Robust construction, Environmental protection
