

Industrial Three-Phase Induction Motor

This high-efficiency three-phase induction motor is designed for industrial applications. It features robust construction with a finned frame for optimal heat dissipation and is suitable for continuous operation in demanding environments.

Overview

High-Efficiency Industrial Performance

This three-phase induction motor is engineered specifically for demanding industrial environments requiring continuous operation. It features a robust, finned frame design that ensures optimal heat dissipation for enhanced durability. With high starting torque and minimized noise and vibration levels, this motor delivers reliable performance while maintaining compliance with international safety and efficiency standards.

Key Features

Operational Benefits

- High starting torque
- Low noise emission
- Low vibration levels
- Optimized heat dissipation
- Easy installation and maintenance

Performance

Certifications & Standards	International Standards Compliant, Industrial Rated
Operational Mode	Continuous operation
