

Industrial Three-Wheel Component

This circular three-wheel component is designed for machinery and industrial applications. It features a central hub with a metal bushing or bearing and a durable outer rim with a tread pattern.

Product Overview

Industrial Three-Wheel Component

This industrial three-wheel component is engineered for reliability in demanding mechanical applications. Designed with a durable outer rim and a reinforced central hub, it provides stable movement and support for various industrial systems. Its specialized tread pattern ensures optimal traction, making it a robust solution for machinery requiring consistent performance.

Technical Details

Material Composition

- Durable black rubber/plastic composite
- Metal central hub insert

Design Features

Three-wheel configuration, Reinforced hub, Industrial tread pattern, Integrated bushing
