

Industrial Timer and Counter

This heavy-duty timer and counter is designed for industrial applications. It features user-friendly controls and clear indicators for ease of operation in manufacturing, automation, and process control systems.

Product Overview

Industrial Precision Instrument

The HH-13 is a heavy-duty industrial timer and counter engineered for high-stakes manufacturing, automation, and process control systems. Designed to withstand harsh environments, this unit features a robust, protective enclosure ensuring longevity and reliability on the factory floor. With intuitive controls and high-visibility indicators, it provides operators with the precise monitoring required for demanding industrial applications.

Technical Specifications

Design Features

- Robust heavy-duty enclosure
- High-visibility indicators
- User-friendly manual controls
- Engineered for harsh environments

Core Functions

Precise Timing • Counting

Model ID	HH-13
Primary Applications	Manufacturing, Automation, Process Control
