

Industrial Timer and Counter Module

This timer and counter module is designed for industrial applications. It provides control and monitoring functionalities within a modular switchboard assembly.

Product Overview

Industrial Timer and Counter Module

This modular timer and counter unit is engineered for precision control and monitoring within industrial switchboard environments. Housed in a durable cabinet, the system provides reliable performance for high-demand automation tasks. The module features integrated selector switches and clear indicators, facilitating efficient manual control and operational status tracking for professionals.

Technical Specifications

Design Features

- Modular enclosure design
- Integrated selector switches
- Visual status indicators
- Metal cabinet housing

Component Type	Timer, Counter
Installation Type	Switchboard Assembly

Key Metrics

Module Capacity

20 pcs

Installed Units
