

Industrial Timer Relay with Digital Display

This timer relay is designed for industrial control applications. It features a digital display for setting precise time intervals and multiple operating modes.

Product Overview

Industrial Precision Timing

The TH-209 is a high-performance timer relay engineered for robust industrial control environments. Featuring a clear digital interface, it allows for precise interval configuration, while the compact DIN rail mounting design ensures seamless integration into modern electrical cabinets. This versatile relay supports multiple operating modes and provides visual status feedback through integrated LED indicators.

Technical Specifications

Display

Digital Display • LED Indicators

Model Number	TH-209
Mounting Type	DIN Rail

Interface & Control

Adjustment Controls

- DIP Switches
- Rotary Selectors

Terminal Inputs	A1, A2, A3, 15, 16, 18, 25, 26, 28
