

Industrial Timer Relay with Dual Timing Ranges

This timer relay is designed for industrial automation and control applications. It offers dual timing ranges adjustable via rotary knobs for precise timing control.

Product Overview

Industrial Precision Timing

The ST3P-R is a versatile timer relay engineered for reliable performance in industrial automation and control environments. It features dual timing ranges that support both minute and second intervals, easily adjustable through integrated rotary knobs. Its compact form factor is specifically designed for seamless integration into standard control panels and electrical systems.

Technical Specifications

Status Indicators

- ON status
- Timing interval marking

Model Identifier

ST3P-R

Timing Intervals

Seconds, Minutes

Adjustment Method

Dual Rotary Knobs
