

Industrial Toe Jack for Lifting

This heavy-duty toe jack is designed for industrial applications. It is ideal for lifting heavy machinery, equipment, and structures in tight spaces.

Product Overview

Industrial Toe Jack

This heavy-duty industrial toe jack is engineered for precise mechanical movement and lifting tasks in tight spaces. Designed with a flexible, 360-degree adjustable toe, head, and lifting rod, it offers exceptional versatility for positioning heavy machinery and equipment. Its robust construction ensures reliable performance, while the integrated safety features provide peace of mind during demanding maintenance and installation operations.

Technical Features

Rotation Capability	360 degrees (Toe, Head, and Lifting Rod)
Ideal Applications	Machinery Moving, Equipment Installation, Maintenance, Repair Tasks, Tight Space Operation

Safety & Design

Safety Mechanisms

Overload Protection • Safety Valve

Material	High-strength steel
