

Industrial Transport Dollies for Heavy Equipment

These transport dollies are designed to move heavy machinery and equipment with ease. Their robust construction ensures stability and smooth rolling for safe operation.

Product Overview

Industrial Load Moving Solutions

These industrial transport dollies are engineered for the professional load mover, offering a robust solution for transporting heavy-duty equipment. The system features a steerable front section combined with adjustable rear trolleys, ensuring maximum safety and ease of operation. Designed with a low-profile construction to keep loads close to the ground, the dollies allow for precise straight-line movement and simplified positioning of heavy objects.

Technical Specifications

Load Capacity Range

6 T

Minimum Capacity

200 T+

Maximum Capacity

System Components

- Steerable front section
- Adjustable rear trolley pair
- Integrated positioning handles

Design Features

Low-profile, Heavy-duty construction, Precision steering, Easy maneuverability
