Overview

High-Efficiency Industrial Tray Washing

This automatic tray washing machine is designed to streamline sanitation processes for industrial facilities, including food processing and pharmaceutical sectors. It features a robust stainless steel construction and a multi-stage cleaning system that includes pre-wash, main wash, rinsing, and drying phases. By automating the cleaning cycle, this system helps facilities establish standardized hygiene protocols while significantly reducing labor costs.

Performance

Cleaning Capacity

600 pcs/hour

Max Cleaning Speed

Technical Specifications

Cleaning Stages

- Pre-wash
- Main wash with high-pressure spray
- Rinsing
- Drying with hot air blowers

Construction Material

Stainless Steel

Adjustable Parameters

Water Temperature, Conveyor Speed, Detergent Concentration

Safety & Design

Safety Features

- Emergency stop buttons
- Overload protection

Design Benefits

Modular Design • Easy Maintenance • Minimal Operator Intervention
