Product Overview

Industrial-Grade Power Transmission

These industrial V-belt pulleys are engineered for optimal power transmission and smooth rotational performance in demanding environments. Available in various material compositions including durable cast iron and lightweight aluminum, they are designed to support diverse industrial machinery requirements. With support for both European and American industry standards, these pulleys can be customized to your specific size and operational demands.

Technical Specifications

Available Materials

- Cast Iron
- Aluminium

Example Identifiers

10A2 • FW

Supported Standards

European Standard, American Standard

Customization

Yes
