

Industrial Vacuum Packaging Machine

This vacuum packaging machine is constructed from stainless steel for durability in industrial settings. It includes a chamber for vacuum sealing, a control panel with a digital display, and wheels for portability.

Overview

Industrial Vacuum Packaging Solution

This industrial vacuum packaging machine is engineered for high-performance sealing and preservation in demanding production environments. Constructed with durable stainless steel, it features an integrated vacuum chamber, an intuitive digital control panel, and a precision pressure gauge for consistent results. Designed for mobility and versatility, the unit is mounted on heavy-duty wheels, making it an ideal asset for diverse industrial packaging applications.

Technical Specifications

Key Components

- Vacuum chamber
- Lid with support arms
- Heavy-duty wheels

Material	Stainless Steel
Mobility	Yes
Control Interface	Digital Display, Pressure Gauge
