

Industrial Vacuum Pump Component

This component is designed for use in industrial vacuum pump systems. It features a multi-tiered construction with a circular base element.

Product Overview

Industrial Vacuum Pump Component

This robust industrial vacuum pump component is engineered for heavy-duty performance in demanding manufacturing environments. Constructed with high-grade, durable metal, it features a multi-tiered design optimized for integration into larger industrial systems. Its reliable build quality ensures consistent operation, making it an essential element for professional-grade vacuum equipment setups.

Physical Attributes

Design Elements

- Prominent circular base element
- Gold-colored decorative rim
- White accent ring

Finish	Light grey industrial paint
Construction	Heavy-duty metal, Multi-tiered, Industrial grade
