

Industrial Vacuum Pump for Engineering and Refrigeration

This vacuum pump is suitable for large engineering equipment. It is also ideal for refrigeration equipment and other vacuum applications.

Overview

Industrial Vacuum Pump

This high-performance industrial vacuum pump is engineered for reliability and efficient operation across demanding environments. It is specifically designed for use with large engineering equipment and refrigeration systems, ensuring consistent and deep vacuum levels. Built with a robust motor and optimized cooling, this unit is an ideal solution for professionals requiring superior performance and minimal downtime.

Technical Performance

Performance Metrics

12 CFM

Vacuum Rate

1 HP

Power Output

Electrical Specifications

220V / 50-60Hz

Compatibility

Supported Refrigerants

R134a, R410A, R407C, R22

Product Details

Primary Applications

- Large engineering equipment
- Refrigeration equipment
- General industrial vacuum work

Model Number

VP220B
