

Industrial Valve

This industrial valve regulates the flow of liquids or gases. It is suitable for various industrial applications requiring precise fluid control.

Overview

Industrial Valve Solution

This industrial valve is engineered for demanding flow control environments, prioritizing safety and reliability in fluid management systems. Designed to withstand rigorous operational conditions, it features robust construction for long-term durability and consistent performance. Its versatile design ensures seamless integration into various industrial pipelines, making it a dependable choice for infrastructure and manufacturing applications.

Technical Specifications

Performance Metrics

16 bar

Pressure Rating

200 °C

Max Temperature

Construction Materials

Stainless Steel, PTFE Seals, Cast Iron Body

Compliance & Quality

Industry Compliance

ISO 9001 • CE Certified • RoHS Compliant

Configuration

Size Range

- DN50
- DN80
- DN100
- DN150
