

Industrial Ventilation Compressor

Heavy-duty compressor designed for industrial ventilation applications. It is suitable for large-scale cooling and air handling systems.

Product Overview

Industrial-Grade Performance

This heavy-duty refrigeration and ventilation compressor is precision-engineered for demanding industrial environments. Built with a robust steel cylindrical housing, the unit is designed to handle large-scale cooling and air handling tasks with reliability. Its integrated cooling fan and versatile connection points make it a flexible solution for complex ventilation infrastructure.

Technical Specifications

Key Components

- Robust cylindrical housing
- Integrated cooling fan
- Multiple industrial connection points

Construction Material	Steel
Suitable Applications	Industrial Ventilation, Refrigeration, Air Handling Systems
