Product Overview

Industrial Ventilation Solution

This industrial ventilation exhaust fan is engineered to provide efficient air circulation and quality management in demanding environments. Designed to effectively remove stale air, humidity, and odors, it features a robust circular frame with multiple mounting points for versatile installation. With multiple size options available, this unit is suitable for a wide range of enclosed spaces requiring consistent airflow performance.

Technical Specifications

Available Sizes

- 350mm (14")
- 400mm (16")
- 500mm (20")
- 600mm (24")

Blade Count	4
Primary Application	Ventilation, Air Exhaust, Humidity Control, Odor Removal
