

Industrial Ventilation Exhaust Fan

This electrical fan is designed for efficient air circulation and exhaust applications. It features a robust metal housing with a circular frame for easy installation and aerodynamically optimized blades.

Product Overview

High-Performance Industrial Ventilation

This industrial ventilation exhaust fan is engineered for efficient air circulation and reliable exhaust performance. Featuring a robust metal housing and aerodynamically optimized blades, it ensures maximum airflow while minimizing operational noise. Its versatile design makes it an ideal solution for a wide range of industrial, commercial, and residential ventilation requirements.

Technical Specifications

Design Features

- Robust metal housing
- Circular frame for easy installation
- Aerodynamically optimized blades

Suitable Applications

Industrial, Commercial, Residential

Performance Metrics

Blade Color

Red
