

Industrial Ventilation Exhaust Vent

This industrial ventilation exhaust vent is designed for efficient air extraction. The metallic construction ensures durability and resistance to environmental factors, making it suitable for compressor ventilation.

Product Overview

Industrial Ventilation Exhaust Vent

This industrial-grade exhaust vent is precision-engineered for reliable air extraction in demanding commercial and refrigeration applications. Its robust metallic construction offers superior durability, making it highly resistant to environmental stressors common in industrial settings. The domed design, combined with a secure square mounting plate, ensures efficient ventilation and simplified installation for professional cooling and airflow systems.

Technical Specifications

Design Features

- Domed exhaust cover for optimized airflow
- Cylindrical base structure
- Integrated square mounting plate

Installation Compatibility

Commercial Ready • Industrial Grade

Construction Material

High-durability metallic construction

Ideal Applications

Industrial Ventilation, Refrigeration, Compressor Ventilation, Commercial Air Extraction
