

Industrial Vertical Milling Machine

This precision vertical milling machine is designed for industrial applications. It features a sturdy frame, adjustable worktable, and a powerful spindle motor.

Overview

Industrial Precision Milling

This industrial vertical milling machine is engineered for high-precision machining across a variety of material types. Built with a robust frame and an adjustable worktable, it ensures stability and versatility for demanding industrial applications. The integration of a powerful spindle motor, convenient foot pedal operation, and a digital readout system allows for enhanced control and consistent performance in professional workshop environments.

Key Features

Machine Type

Vertical Milling • Industrial Grade

Model Identifier

HL-X3045

Technical Specifications

Performance Highlights

1 Powerful

Spindle Motor

Control System

Digital display for precise control

Operation Method

Foot pedal included

Build Quality

Sturdy Frame, Adjustable Worktable
