

Industrial Vibrator Motor for Screens and Feeders

This industrial vibrator motor is designed for various applications. It is suitable for use in vibrating screens, feeders, and compactors, providing consistent and reliable vibration.

Overview

Industrial Vibrator Motor

This robust industrial vibrator motor is engineered for durability and efficient performance in demanding environments. Designed for use in vibrating screens, feeders, and compactors, it provides consistent and reliable vibration force. The unit features a heavy-duty construction with a sealed enclosure to protect against dust and moisture, ensuring long-lasting operation in challenging conditions.

Technical Details

Protection

Dust Proof • Moisture Resistant

Model Number

B-10027

Key Features

Adjustable Eccentric Weights, Heavy-Duty Construction, Sealed Enclosure

Applications

Compatible Equipment

- Vibrating Screens
- Feeders
- Compactors
