

Industrial Vibratory Motor

This vibratory motor is designed for continuous operation and features a durable construction to withstand harsh environments. Its adjustable eccentric weights allow for precise control of vibration force and frequency.

Product Overview

Industrial Vibratory Solution

The ZW/ZN series vibratory motor is a robust and efficient solution for various industrial applications requiring consistent vibration. Designed for continuous operation, it features a durable construction engineered to withstand harsh environments. With adjustable eccentric weights, users gain precise control over vibration force and frequency to suit specific operational needs.

Key Features

Sealed Enclosure, Adjustable Eccentric Weights, Heavy-duty Bearings, Versatile Mounting

Technical Specifications

Primary Applications

- Material conveying
- Screening processes
- Compacting
- Feeding systems

Environmental Protection

Dust Proof • Moisture Resistant
