

Industrial Vibratory Motor

This vibratory motor is designed for industrial applications such as vibratory feeders and screens. It features a robust construction with mounting feet for secure installation, providing reliable vibration generation for material handling and processing.

Overview

Industrial Vibratory Motor

This robust industrial vibratory motor is engineered for high-performance material handling and processing tasks. Featuring a durable construction with a specialized teal body and orange end covers, it is designed to provide reliable and efficient vibration generation. It is an ideal solution for integration into vibratory feeders, screens, and compactors, ensuring consistent operation in demanding industrial environments.

Technical Specifications

Suitable Applications	Vibratory Feeders, Screens, Compactors
Mounting Configuration	Integrated mounting feet

Design Features

Construction Style
Robust Design • Industrial Grade
