Product Overview

Industrial-Grade Air Circulation

This heavy-duty industrial wall fan is engineered for high-performance cooling in demanding environments like mineral factories, workshops, and large warehouses. Featuring a robust pure copper motor with built-in overheat and overload protection, it ensures long-lasting reliability and safety. The optimized aluminum-iron blade structure delivers large air volume with low noise, while the convenient pull-cord switch allows for effortless adjustment between three speed settings.

Technical Specifications

Motor & Performance

3 levels
Speed Settings

100 Pure Copper
Motor Type

Safety & Protection

Over-heat protection, Overload protection, Reinforced cross base

Design & Construction

Design Features

- Wall-mounted installation
- Pull-cord operation
- Powder or chrome guard finish
- Optimized aluminum-iron blade structure

Application

Ideal Environments

Mineral Factories • Workshops • Warehouses • Large Halls
