

Industrial Wall Mount Fan for Ventilation

This industrial wall fan provides powerful air circulation for large spaces. It features multiple speed settings and adjustable tilt for customized ventilation.

Product Overview

Industrial Wall Mount Fan

This heavy-duty industrial wall fan is engineered for efficient air circulation in large-scale environments such as warehouses, factories, and workshops. It features a robust metal frame construction and a high-performance motor designed for durability and continuous operation. With adjustable tilt and multiple speed settings, it provides customizable ventilation to meet diverse industrial requirements.

Technical Specifications

Performance Metrics

1350 rpm
Speed

100 W
Min Power

280 W
Max Power

Available Sizes

450mm, 500mm, 600mm, 650mm, 750mm

Air Flow Capacity

130 - 290 m3/min

Features

Key Features

- Robust metal frame construction
- High-performance industrial motor
- Adjustable tilt mechanism
- Multiple speed settings

Applications

Suitable Environments

Warehouses • Factories • Workshops • Industrial Facilities
