

Industrial Wall-Mounted Fan

This industrial wall-mounted fan provides ventilation and air circulation in large spaces. Its space-saving design mounts to the wall and features aerodynamically designed blades for optimal air movement.

Product Overview

Industrial-Grade Air Circulation

This heavy-duty industrial wall-mounted fan is engineered for efficient ventilation in large-scale environments like warehouses, factories, and workshops. The space-saving wall-mount design ensures powerful airflow without consuming valuable floor space. Built with a 100% pure copper motor and aerodynamic blades, it offers durable, high-performance cooling for demanding industrial settings.

Technical Specifications

Available Sizes

- 20 inch (500mm)
- 24 inch (600mm)
- 26 inch (650mm)
- 30 inch (750mm)

Blade Configuration	2 Blades, 3 Blades, 4 Blades
Motor Material	100% Pure Copper
Blade Material	Aluminium

Design & Installation

Mounting Style

Wall-Mounted

Construction Details

- Robust metal protective cage
- Corrosion-resistant powder-coated finish
- Aerodynamic blade design
- Includes secure mounting bracket
