

Industrial Washing Machine

This automatic industrial washing machine is a robust and efficient solution for demanding laundry environments. Designed for heavy-duty use, this offline washing machine offers precise control over the washing process, ensuring optimal cleaning performance and fabric care.

Overview

Industrial Washing Performance

The XGQ-200FQ is a high-capacity industrial washing machine designed for demanding environments requiring reliable and automated fabric care. Featuring a programmable microcomputer control system with a large dot-matrix LCD interface, it provides precise automation for the entire washing, disinfecting, bleaching, and dehydration cycle. Its suspended vibration-absorber structure ensures stability and quiet operation without the need for a specialized foundation.

Performance

Operational Capabilities

- Programmable microcomputer control
- Variable frequency speed control
- Four-speed dehydration settings
- Automatic door opening and closing
- Automatic tilt discharging

Key Operational Metrics

4 levels

Dehydration Speeds

Drainage Efficiency

Yes
