

Industrial Water-Cooled Condensing Unit

This industrial-grade water-cooled condensing unit is engineered for HVAC and refrigeration applications. It features a durable frame, high-efficiency compressors and advanced control systems for reliable performance.

Product Overview

Industrial-Grade Performance

This water-cooled condensing unit is engineered for demanding HVAC&R applications, offering robust durability and precise thermal management. Equipped with high-efficiency compressor technology, the system ensures reliable operation in intensive industrial environments. It features integrated safety monitoring and is built to meet established standards for industrial cooling efficiency.

Technical Specifications

Cooling Capacity

17.99 kW

Cooling Capacity

Refrigerant

R22

Model Number

SCBH-9W

Evaporation Temperature

-10 °C

Power and Mechanical

Power Supply

380V/3/50Hz

Net Weight

228 kg

Safety and Monitoring

Integrated Gauges

Low Pressure (LP) Gauge, High Pressure (HP) Gauge

Manufacturing Details

Manufactured Date	August 2016
Product ID	201608079
