

Industrial Water-Cooled Screw Chiller

This industrial water-cooled screw chiller is designed for efficient cooling in various industrial applications. The robust chiller system features a screw-type compressor, ensuring reliable and consistent performance.

Product Overview

Industrial Efficiency

This industrial water-cooled screw chiller is engineered for high-performance temperature control in demanding industrial environments. Utilizing advanced screw-type compressor technology, it ensures reliable and consistent cooling output for continuous operation. Its versatile design supports multiple cooling configurations, making it an ideal solution for a wide range of process cooling needs.

Application Areas

Industries Served

Pharmaceutical, Chemical, Food Processing, Plastics, Electronics, Textile, Electroplating, Paper, Laminate Flooring, Hospitality

Technical Features

Supported Cooling Methods

- Water-cooled screw chiller
- Air-cooled screw chiller
- Water-cooled box chiller
- Air-cooled box chiller
- Evaporative cooled water chiller

Compressor Technology

Screw Type
