

# Industrial Water Cooler Heat Exchanger

This industrial water cooler heat exchanger is designed for efficient thermal management. The robust unit features a cylindrical shell-and-tube design with multiple flanged connections.

## ADDITIONAL IMAGES

## Product Overview

### Industrial Heat Exchange Solutions

This industrial-grade water cooler heat exchanger is engineered for high-performance thermal management in heavy-duty machinery. Featuring a robust shell-and-tube design and a durable protective coating, it ensures reliable cooling and operational longevity. The unit is equipped with integrated reservoirs, pressure relief valves, and secure mounting points, making it suitable for demanding industrial applications.

## Compatibility and Part Numbers

### Compatible Part Numbers

- ZSLG2.8-16-00H
- Z3900414H
- ZSLG1.6-16-00H
- 3655858
- 3011108
- 3050385

### Supported Engine Models

4BT, 6BT, 6CT, NTA855, KTA19, KTA38

## Shipping and Logistics

### Supported Shipping

Air Freight • Sea Freight

### Packaging Standard

Neutral carton package with shipping mark
