

Industrial Wedge Wire Screen for Filtration

These wedge wire screens are designed for industrial filtration applications. Their precise wedge-shaped wires are welded to create accurate slot openings, which ensures efficient separation.

Product Overview

Industrial Filtration Excellence

These industrial wedge wire screens are engineered for high-performance filtration in demanding environments. Constructed with precision-welded wedge-shaped wires, they provide exact slot openings to ensure efficient separation and sustained operational flow. Their robust structural design offers superior resistance to clogging and mechanical wear, making them a reliable choice for critical industrial processes.

Certifications

Quality Standards	ISO 9001, CNAS, IAF, UKAS
-------------------	---------------------------

Technical Features

Operational Advantages

- Precision-welded wedge wire construction
- Customizable slot openings for precise separation
- High resistance to clogging
- Durable design for industrial load

Construction	Wedge-shaped wire welded structure
