

Industrial Welded Pipes

These welded pipes are suitable for fluid transfer, structural support, and construction purposes. The pipes have a uniform metallic finish and come in various sizes.

Product Overview

Industrial Welded Piping Solutions

These industrial welded pipes are precision-engineered to meet stringent international quality standards, ensuring durability and reliability for demanding environments. Designed for versatility, they are suitable for fluid and gas transportation, structural support, and complex mechanical systems. Each pipe undergoes rigorous manufacturing processes to withstand high pressure and temperature conditions, providing superior strength and corrosion resistance.

Technical Standards

Available Types

- Light Welded Steel Pipe
- Medium Welded Steel Pipe
- Plain End Pipe
- Stainless Steel Industrial Liquid Pipe

Compliance Standards

BS1387:1985, ASTM A53-90b, ASTM A312, JIS G3459, CNS G3124

Specifications Table

Performance Specifications

Standard	Classification
BS1387:1985	Light & Medium Steel
ASTM A53-90b	Schedule 40
ASTM A312	Industrial Liquid Pipe
JIS G3459	Industrial Liquid Pipe
CNS G3124	Industrial Liquid Pipe
